

地图文件更新说明

地图文件更新说明

1. 下载压缩包放到虚拟机~/dev_ws 目录

2. 解压压缩包,复制里面的yzbot文件夹,替换src里面的文件

3. 回到~/dev_ws 目录打开终端重新编译让新文件生效

输入 colcon build

A screenshot of a terminal window with the title 'ros@u22: ~/dev_ws'. The terminal shows the execution of the 'colcon build' command and its output. The output lists the packages being built and the time taken for each, followed by a summary of the total build time.

```
ros@u22:~/dev_ws$ colcon build
Starting >>> linkattacher_msgs
Starting >>> mybot_description
Finished <<< mybot_description [1.14s]
Starting >>> bot_navigation
Finished <<< bot_navigation [1.05s]
Starting >>> hello_moveit
Finished <<< linkattacher_msgs [10.3s]
Starting >>> tools_demo
Finished <<< tools_demo [1.00s]
Starting >>> mybot
Finished <<< mybot [1.02s]
Starting >>> ros2_linkattacher
Finished <<< hello_moveit [15.5s]
Finished <<< ros2_linkattacher [17.9s]

Summary: 7 packages finished [30.8s]
ros@u22:~/dev_ws$
```

4. 关闭终端重新打开,运行新的启动命令

ros2 launch mybot gazebo_world2.launch.py 代替原来的 ros2 launch mybot gazebo_world.launch.py

ros2 launch bot_navigation nav_bringup_gazebo2.launch.py 代替原来的 ros2 launch bot_navigation nav_bringup_gazebo.launch.py
